

人间最美四月天 不负春光和时行

初春，天地间的凉意已渐渐散去，春风和煦，杨柳倾斜，光影如幻。我们行走在春意盎然的四月，在花香里感受春的芬芳与生机。一岁一朝，一季一晨，万物都在生动地诉说着属于春天的故事。

春光作序，万物共鸣。春日像双大手，束缚的同时也放纵了一些。在这悄然转换之际，春天悄无声息地来临。清晨的第一缕阳光洒落人间，枝头的鸟儿啾啾起清脆明亮的歌声，像号角，像音符。早起的行人惺忪着双眼，褪下棉衣，和着春光。自行车在日光下游走，小汽车呼呼地疾驰着，公共交通工具晃悠悠地载满忙碌的行人。五颜六色的身影在眼前匆匆掠过，车轮滚动间发出“吱吱”的声响。目之所及，皆是美景。保洁车旁褪去叶子的竹扫帚，光秃秃地立在地上，投下一片斑驳的影子。校园内，三三两两的大学生成群结队，欢声笑语间，各自朝着班级的方向散去。远处，保安大叔的值勤身影渐行渐远，最终消失在熙攘的人群之中。

春和景明，不负韶华。古老的垂柳吐露着嫩绿

的新芽，百花的馨香弥散在校园的每个角落，使人醉了心神。移步教学楼，静心倾听外语学院学子们朗朗的读书声，仿佛置身异国他乡。走进计算机学院的机房，每台机器的键盘上是指尖与键帽的接触声——啪嗒啪嗒，回响耳际。“玉不琢，不成器；人不学，不知道”一席古语，道出其中意蕴。鲁迅先生曾寄语青年：“你们所多的是生力，遇见深林，可以辟成平地的，遇见旷野，可以栽种树木的，遇见沙漠，可以开掘井泉的。”奋斗中的青年充满生机与活力，他们以梦为马，不负韶华，用智慧与汗水书写青春最亮丽的底色。

百花争艳，万物更新。春天，赋予人类新生的蓬勃与朝气。正如陈独秀先生所言：“青年如初春，如朝日，如百卉之萌动，如利刃之新发于硎。”作为新时代的青年，趁年轻，趁春光，哪怕山高水长，哪怕步履跌宕，也要勇往直前、砥砺前行，以青春的力量、青春的创造，谱写出一个更加美好的明天！

数智驱动 聚焦车驾

——三联交通公司新品亮相第十四届中国国际道路交通安全产品博览会暨公安交警警用装备展

“鼓浪屿上琴声悠，南普陀寺钟声远。”4月10日，在这美丽的海滨城市厦门，一场交通行业的盛宴——第十四届中国国际道路交通安全产品博览会暨公安交警警用装备展（以下简称交博会）在厦门国际会议展览中心盛大开幕。作为我国交通行业的领军企业，三联交通公司携多款新品亮相本次盛会，展台内人头攒动，气氛热烈，为这场交通盛宴增添了一抹亮色。

本次展会，三联交通公司展示了智能驾考、智慧驾培和智慧城市交通秩序治理等一体化多场景应用解决方案，融合数字技术在交通安全领域的应用。其中包括智能紧急制动安全辅助系统、车驾管综合业务分析研判系统、无人机管控平台等创新产品，充分体现了三联交通公司在推动交通安全行业科技化、数智化发展方面的实力和决心。

智能紧急制动安全辅助系统作为本次展会的亮点之一，以其安全、智能的操作体验受到了广泛关注。系统通过设备感知捕捉车辆前方实时路况信息和实时图像，结合人工智能和深度学习算法，基于预设的多种安全辅助制动预案，实现车辆在危险情况下紧急制动。同时，生成报警数据和录像发送到系统管理后台，助力实际道路考试安全、公平与

公正。

车驾管综合业务分析研判系统则是三联交通公司针对车驾管业务监督管理问题推出的解决方案。该系统采用AI视频分析技术和大数据分析算法，实现对车驾管业务数据和视频的智能分析研判，自动研判异常数据，主动推送给后台监管人员，从而缩小了监管范围，提高了监管精度，节约了警力资源，提升了业务管理科技化水平，实现了监管工作的常态化、精细化和智能化。目前，该系统已在多个城市成功应用，取得了显著的成效。

此外，无人机管控平台也备受参观者关注。无人机监测道路交通成常态，无人机的引入绝大部分被应用于弥补传统监控不足、提高交通管理效率、应对突发事件响应速度方面。无人机参与执法成为多地交警部门的常规举措，具备占用应急车道抓拍、高音喊话、事故点高清录像等功能。通过无人机进行远程事故勘查，实现人机分离、远程操控，从而加快勘查速度，减少警力投入，最大限度降低人身安全风险。

在三联交通公司的展台内，移动摩托车考试系统、驾驶模拟器、自助体检机等产品吸引了众多参观者驻足观看，他们纷纷兴致勃勃地了解这些创新产品的功能和优势。

未来，三联交通公司将继续秉持客户至上的原则，紧密围绕实战需求，以创新的数智化成果助力交通管理升级，全面提升工作效能和战斗力，致力于为智慧交通领域的高质量发展注入持久动力，共同书写交通强国的壮丽篇章。

春光作序 万物和鸣

“柳丝长，春雨细，花外漏声招娣”不知不觉已到四月，四月是什么呢？是韩愈笔下的“草木知春不久归，百般红紫斗芳菲”，或是白居易的“人间四月芳菲尽，山寺桃花始盛开”，抑或是林徽因在烟台写下的“你是夜夜的月圆。雪化后那片鹅黄，你像；新鲜初放芽的绿，你是；柔嫩喜悦，水光浮动着你梦期待中白莲。你是一树一树的花开，是燕在梁间呢喃，——你是爱，是暖，是希望，你是人间的四月天。”

细雨撒花前，春风拂柳边。丝丝春雨，轻轻洒落，人间万物都沐浴在这柔和的雨里。树枝上抽出嫩芽，在雨中摇曳着，显得格外娇嫩。花瓣在雨中绽放，被雨水打湿的蝴蝶，静静地趴在花蕊上，似乎在聆听这世间最美妙的音乐。微风轻轻拂过大地，如细水长流，悄无声息地渗入人们的心田。

人间四月，春光作序，万物和鸣。春归燕子筑新巢，蜜蜂采蜜绕花间。暖阳之下，校园之中，路边白如扇贝的梨花，千军万马地竞相绽放；娇艳欲滴的桃花，明艳中透出淡雅的迷人气质。操场上，红色的跑道与翠绿的树木相映成趣，青春洋溢的少男少女们不时发出明朗悦耳的笑声，此情此景便是“这草正旺，树正绿，少年必是风华正茂”的真实写照吧！

“春风得意马蹄疾，一日看尽长安花。”青春是意气风发，激情飞扬。我们的青春，正如这春日的明媚，历经风雨洗礼，终将绽放出繁花似锦的绚烂盛景。值此青春年华，让我们以梦为马，带着心中热爱奔赴山海，书写自己的无悔青春！

“The sound of the qin on Gulangyu Island is melodious, the bell of South Putuo Temple reverberates in the distance.” On April 10th, in the beautiful coastal city of Xiamen, a grand event in the transportation industry, the 14th China International Road Traffic Safety Products Expo and the Public Security Traffic Police Equipment Exhibition (hereinafter referred to as the Traffic Expo), opened grandly at the Xiamen International Conference & Exhibition Center. As a leading enterprise in China’s transportation industry, Anhui Sanlian Applied Traffic Technology Company unveiled a variety of new products at this event. The booth was crowded with people, and the atmosphere was lively, adding a bright touch to this transportation feast.

At this exhibition, Anhui Sanlian Applied Traffic Technology Company showcased integrated solutions for intelligent driving exams, smart driving training, and smart urban traffic order management, integrating digital technology into the field of traffic safety. This includes innovative products such as the Intelligent Emergency Brake Safety Assistance System, the Vehicle Operation Comprehensive Business Analysis and Judgment System, and the Drone Control Platform, fully demonstrating Anhui Sanlian Applied Traffic Technology Company’s strength and determination in promoting the technological and digital development of the traffic safety industry.

The Intelligent Emergency Brake Safety Assistance System, one of the highlights of this exhibition, attracted

widespread attention due to its safe and intelligent operating experience. The system captures real-time road conditions and images in front of the vehicle through equipment perception, and combines artificial intelligence and deep learning algorithms to implement emergency braking for vehicles in dangerous situations based on preset safety assistance braking plans. At the same time, it generates alarm data and videos sent to the system management background, assisting in actual road exam safety, fairness, and justice.

The Vehicle Operation Comprehensive Business Analysis and Judgment System is a solution launched by Anhui Sanlian Applied Traffic Technology Company to address supervision and management issues in vehicle operation. The system uses AI video analysis technology and big data analysis algorithms to intelligently analyze and judge vehicle operation business data and videos, automatically judge abnormal data, and proactively push them to the background supervision personnel, thereby narrowing the scope of supervision, improving supervision accuracy, saving police resources, enhancing the technological level of business management, and realizing the normalization, refinement, and intelligence of supervision work. Currently, the system has been successfully applied in multiple cities, achieving significant results.

In addition, the Drone Control Platform also attracted the attention of visitors. Drone monitoring of road traffic has become commonplace, with drones

mainly used to supplement traditional monitoring shortcomings, improve traffic management efficiency, and respond to emergencies. Drones participating in law enforcement have become a routine measure for many traffic police departments, with functions such as capturing emergency lane violations, loudspeaker announcements, and high-definition recording at accident scenes. Remote accident investigation through drones achieves separation of personnel and machines, remote control, speeding up investigation speed, reducing police deployment, and minimizing personal safety risks.

At the booth of Anhui Sanlian Applied Traffic Technology Company, products such as mobile motorcycle examination systems, driving simulators, and self-service health examination machines attracted

many visitors to stop and watch. They eagerly learned about the functions and advantages of these innovative products.

In the future, Anhui Sanlian Applied Traffic Technology Company will continue to uphold the principle of customer supremacy, closely focus on actual combat needs, and use innovative digital achievements to assist in upgrading traffic management, comprehensively improving work efficiency and combat effectiveness, and striving to inject lasting power into the high-quality development of the smart transportation field, jointly writing a magnificent chapter of building a strong country in transportation.

Before the interns leave the school, the school has organized multiple internship safety education and career planning thematic lectures, further enhancing interns' safety awareness and

ensuring their internship rights and safety. Through a series of measures, the school ensures interns leave safely and smoothly enter internship positions.

The learning journey is long, and internships are not only a crucial stage for the formation of professional abilities but also an important link between medical-related professional knowledge and clinical practice. It is hoped that students can fully and deeply experience the professional environment of their major during this clinical internship, systematically enhance their professional abilities, promote the coordinated development of knowledge and skills, and thus lay a solid foundation for the future medical and nursing career.
